

The Department of Health and Human Services is currently doing a national survey on health related issues and will have representatives in the Carpentersville area going door to door through the end of the year.

All information collected is confidential and will be used only for statistical purposes. They have selected addresses at random and will not visit each resident. If your address is selected an interviewer from the Research Triangle Institute (RTI) will come to your door. The survey is voluntary. The interviewer will have a photo ID issued by RTI International and the Department of Health and Human Services.

The Village is posting this announcement as a courtesy to inform residents that these representatives are involved in a legitimate endeavor. As with anyone who comes to your door soliciting for products or information, you are encouraged to ask for identification. If you have any questions regarding this survey please contact Ilona Johnson, National Field Director, at 1-800-848-4079.
